Objective

To work in an environment that inspires continual personal and professional development to fulfill my potential and aspirations. To apply my programming and analytical expertise to help provide innovative IT solutions that meet the technical and business expectations of clients.

Experience

Software Engineer, Kerala Land Information Mission, 2009 -
Trivandrum, Kerala

The Kerala Land Information Mission was set up by Government of Kerala to facilitate the complete resurvey of the State. The aim of the mission was to accomplish the resurvey using modern digital techniques, aerial photogrammetry and ground survey using modern survey equipments. Several projects were setup to meet this goal.

Key responsibilities

- Manage the Module customization of Bently cadastral by third party vendor/ developer.
- Designing land management system.
- ETS Survey Work Scheduling.
- Terrain analysis using DEM and Quickbird data.
- Image enhancement, ortho-rectification, geo processing operation (vector and raster).
- Supervised and unsupervised classification in Erdas Imagine.
- Grid based field work progress reporting using ArcGIS.
- Digitization of old records.
- Web application design and programming using Python, .Net, PHP, MySQL
- Set up and administration of local web servers and networks.

Education

Bachelor of Technology in Computer Science, 2005 - 2009

University of Kerala.

Percentage: 66.8%

Higher Secondary, 2003 -2005

St Mary's Higher Secondary School

Percentage: 80%

High School, 1992 - 2003

Mannam Memorial Residential Higher Secondary School

Percentage: 77.5%

Skills

Operating Systems

Windows, Linux and Mac.

GIS / CAD Tools

ESRI ArcGIS, QuantumGIS , Leica Erdas Imagine,
AutoCAD, LisCAD, Bentley Microstation.

Languages

C, C++, C#, Java, Python, SQL,PI/SQL.

Web Technologies

HTML, CSS, JavaScript, PHP, ASP.net, XML, Ajax, JQuery,
Adobe Flex

Application Suite

Microsoft Office Suite, Adobe Photoshop.

Database Systems

Oracle 9i~10g, Microsoft SQL server, MySQL.

Software Projects

WorkFlow Analysis Map Project

WorkFlow Analysis Map Project is built using Mapserver Pro and using Quantum GIS application. The aim of the project is to Analyze the Grid Work Progress in the field and monitor it over the web. This project is successfully running in SPO intranet. Developments in this project is still going on.

Responsibilities in this project

- Developing and Editing Shape File.
- Application Designing.
- Mapserver Management Module in PHP.

MMS - Manpower Management System

MMS is a Manpower Management System which is built on Php technology. MMS application helps to store, manage and report strategic unit's details. This application help project managers to manage the manpower delivery and quality in all units. Simplified GUI powered by jquery provide quick mastering of the application.

Responsibilities in this project

- Application Designing.
- User Interface Designing.
- Developing Employee Transfer Module.
- Developing Work Arrangement Module.
- Application Testing.
- Application Administration.

AMp - Asset Management Portal

AMp is a Asset Managing application which is built on Php technology. AMp help the logistics manager and supervisor to manage assets of the office like GPS, ETS, Servers and all others. In AMp each unit have a portal, which helps to manage and transfer assets between units. Simple GUI reduce the complexity of the application from the end users. Also an AMp desktop version optimized to run on ubuntu machine is developed using Python. For the project we choose MySql as back end data repository, wxPython as GUI library.

Responsibilities in this project.

- Application Design.
- Database Designing.
- Developing Device Tracking Module for both web and desktop versions.
-

GPS Data Library

GPS Data Library is Desktop GPS Details management application which is built using Adobe AIR technology. GPS Data Library help the surveyors giving them all details about GPS points, Location map (including google maps), photographs of the location and all GPS point parameters. Using the application they can easily take reports of GPS data.

Responsibilities in this project.

- Application and Database Design.
- User Interface Designing.
- Developing Google Map integration Module.
- Developing Data porting Module.
- Report Designing.

Support

- Support in maintaining BhoomiKeralam Website.

Freelance Web Projects

- Omkara Holidays. (www.omkaraholidays.com)
- Cocoland Resort. (www.cocoland.in)

Academic Projects

Easy SQL - Database Management System

EasySQL is a database management system built on Borland Turbo C++ v3.0. It is powered by SQL and has an easy to use interface. It provides basic functionalities like forms, reports, Charting. A reliable recovery system is also built into the product.

Omnis - Business Intelligence Application

Omnis is a Business Intelligence Web Service built on Microsoft .net Framework over Windows Azure Cloud Server. It is powered by ASP Technologies and has an easy to use interface using JQuery. It provides basic functionalities like reports, Charting, Excel Sheet Transformation. This application is a prototype made for an Australian company, Meta Concepts.

Key personal and inter personal skills

Analysis and Problem - Solving

My academic project is testament to my rigorous approach in analyzing issues and solving problems. Easy SQL development presented me with many challenging issues. I was able to resolve all of these issues using my analysis and problem solving skills. Being in a team of novice programmers I was required to identify and troubleshoot coding issues with quicker turnaround times.

Project Coordination

In my personal life, I have assumed project coordination roles and learned from the people around me. As cultural events coordinator, I was able to successfully organize various events, coordinating the work of different people. This has also taught me the importance of understanding the strengths and weaknesses of team members and using this information to support a team in reaching its objectives.

Personal Information

Date of Birth	1st August, 1988
Nationality	Indian
Father's Name	Justus Lawrence
Mother's Name	Jessy Justus
Gender	Male
Languages	English and Malayalam
Interests	Programming, Listening music and Designing
Strengths	Self motivated, quick learner, good communication skills, optimistic
